

Jacob Elnaggar

Professional Experience

LSU SCHOOL OF MEDICINE, NEW ORLEANS, LA

Medical Student Researcher

June 2018 - August 2018

- Conducted research with Christopher Taylor, PhD. in the department of Microbiology, Immunology, and Parasitology.
- Worked on analyzing the vaginal microbiota in women with chlamydia for specific microbial communities.
- Used R packages such as UPARSE, Qiime, and Dada2.

BAYLOR UNIVERSITY, WACO, TX

Bioinformatics Capstone Project,

August 2017 - December 2017

- Worked with Erich Baker, PhD, on his bioinformatics website, Geneweaver.org
- Created an algorithm for users to compare multiple gene interaction networks, allowing biologists to discover underlying patterns in a specific disease

MD ANDERSON CANCER CENTER, HOUSTON, TX

Independent Researcher in

Bioinformatics/Computational Biology

Department,

June 2017 - August 2017

- Internship at the number one cancer research center in the world
- Implemented a computational model that analyzes cancer biopsies and nominates treatment therapies
- Used my combined knowledge of computer science and cancer biology
- Advanced network modeling and machine learning

BAYLOR SCOTT & WHITE MEDICAL CENTER, WACO, TX

Consultant,

January 2017 - May 2017

- Worked in a team to create a database for the hospital
- Designed to store procedure information for a patient before, during, and after each operation
- User-friendly website as the front end
- Created this using MySQL, PHP, Java Script, and HTML

LSU HSC BIOINFORMATICS, NEW ORLEANS, LA

Bioinformatician and Data Analyst,

June 2016 - August 2016

- Research internship at LSU Health Science Center
- Worked in the Bioinformatics and Genomics program
- Analyzed large sets of patient data for genomic patterns in breast cancer
- Curated a manuscript from the findings that is being published

LSU HSC, NEW ORLEANS, LA

Researcher in Physiology Department,

June 2015 - August 2015

- Research internship at LSU Health Science Center in the Physiology department
- Mapped protein expression in Rhesus Macaque prefrontal cortex to model the effect of combined stimuli using network modeling

Education

LSU SCHOOL OF MEDICINE, NEW ORLEANS, LA

2018-2022

MD Candidate

BAYLOR UNIVERSITY, WACO, TX

2014-2018

BS in Bioinformatics 3.9 GPA (Magna Cum Laude)

Relevant course work:

Datamining
Software-Engineering
Biochemistry
Machine Learning
Computer Networking

Skills and Abilities:

Python
C, C++
Java
R
SQL
Java Script , HTML
Git
Windows OS, Mac OS, Linux OS

Extracurricular Organizations

- New Orleans Medical Innovators Team Leader.

NOMI is a student run health care incubator program that aims to develop solutions to real world health care problems. I am working on a virtual reality tool to help Radiation Oncologists orientate themselves with their environment to more effectively provide treatment.

- Association of Bioinformatics and Biotechnology Vice President.

ABB is an academic club designed for bioinformatics students and students who are interested in the fields of bioinformatics and biotechnology.

- Baylor Medical Ethics Discussion Society Service Officer.

I lead volunteer events in the Waco area, including Mission Waco, and I help our members get involved with service.

- Computer Science/Bioinformatics Tutor/Mentor.

I tutor and mentor freshman Bioinformatics students during their first year at Baylor University.
